

KYC/AML Policy

The purpose of the Anti-Money Laundering and Know Your Customer Policy ("AML/KYC Policy") is to prevent money laundering and terrorist financing activities on the Service by complying with the requirements of international and domestic laws and implementing a user identification procedure.

Through the business of Legal partner Kostiantyn Kryvopust we have already a database of existing companies in international trade of goods and services businesses. On top of it, we have used 3rd party data and developed a KYC scoring model, which maps the customers into 3 zones: Green, Yellow and Red.

We consider following risk categories: AML Risk, Sanction risk, Performance risk.

The model consists of several functions and weights of the function which target different risk areas.

We focus on the following factors in our model:

A = market check. We check if the company is known on the market and what is the reputation in the market. [Performance/AML]

B = financial check. We check the financial soundness of the company (3-5 years). [Performance]

C = UBO declaration / UBO – check. We check if the UBO of the company is the real economical beneficiary of the company and do a market check. [AML/Sanctions]

D = authenticity of cargo origin and pricing. We check the origins of the goods to bring transparency and avoid any sanctions. [AML]

E = sanctions. We check if the company/goods/UBO/production sites fall under any sanctions. The value is binary. [Sanctions]

F = political exposure / government relation. We check if the company/UBO/management has any government exposure (i.e. not PEP but working with PEPs, GOs, etc.). [Sanctions/AML]

G = management qualification. We check if the management is qualified enough to perform the declared transactions. [Performance]

H = affiliation check. We check other companies in the group if they have any negative kind of information. [AML/Sanctions/Performance]

General Provisions

1.1. The Company must comply with the requirements of the domestic and international laws on the prevention of money laundering and terrorist financing, as well as the requirements

of other laws and regulations, to the extent that they are related to the activities of the Company.
